> **Instructions for Staff:**
> All employees, service advisors, sales executives, and managers must adhere strictly to the protocols set forth in this manual. Any discrepancies or system deviations must be reported immediately to the System Administrator.

System Overview & Architecture

CHAPTER 1

1.1 Introduction

Gurudev Motors is Raipur's premier multi-brand two-wheeler dealership representing leading manufacturers including Hero, Honda, TVS, Bajaj, and Suzuki. The integrated software platform consists of two unified environments:

- **Public Customer Web Portal:** High-performance, SEO-optimized, mobile-responsive web platform designed for customers to discover motorcycles and scooters, calculate EMIs, evaluate exchange vehicles, schedule service, and connect via WhatsApp.
- **Admin & Business Management Portal (DMS):** Secure, multi-role dealership management system handling showroom operations, CRM lead pipelines, vehicle stock inventory, workshop job cards with A4 printing, finance applications, and financial analytics.

1.2 Core Architectural Principles

COMPONENT	TECHNOLOGY / STACK	OPERATIONAL FUNCTION
Frontend Architecture	Next.js 15 (App Router), React, Tailwind CSS	Delivers sub-second page loads, Core Web Vitals compliance, and responsive touch interfaces on mobile and desktop.
Backend API	Next.js Server Endpoints, TypeScript	Enforces role-based permissions, transactional data validation, and automated notifications.
Database Layer	PostgreSQL with Prisma ORM	Maintains relational data integrity, indexing, foreign key constraints, and relational queries across models.
Security & Auth	JWT (JSON Web Tokens), HttpOnly Secure Cookies	Stateless authentication with automatic role scope verification on every protected route.
Audit & Logging	System Audit Trail Engine	Every create, update, and delete action records user ID, IP, module, and change delta.

1.3 System Access Points

- **Public Web Portal:** `https://gurudevmotors.com` (or primary production domain)
- **Admin & Staff Login:** `https://gurudevmotors.com/admin/login`
- **Default Initial Super Admin:** `admin@gurudevmotors.com`

> **Security Notice:**
> Staff members must never share their personal login credentials. All actions executed under an account are logged irreversibly in the system audit trail.

Public Website Operations

CHAPTER 2

2.1 Customer Journey Overview

The public website is designed to guide prospective buyers seamlessly from vehicle discovery to showroom visit or service booking.

1 Vehicle Exploration & Catalog

Customers can filter two-wheelers by category (Commuter, Sports, Scooter, Electric), brand (Hero, Honda, TVS, Bajaj, Suzuki), engine capacity (CC), and price range. Clicking on any bike displays high-resolution imagery, technical specifications, and key features.

2 Interactive Road Hero & Showroom Presentation

The homepage features an authentic road showcase displaying verified two-wheelers in motion against the landmark Raipur backdrop. This showcase is permanently decoupled from inventory changes to guarantee brand aesthetics.

3 EMI & Loan Calculator

Located at `/finance`, customers can calculate monthly EMIs using both **Reducing Balance** and **Flat Rate** methods. Upon entering loan amount, down payment, tenure, and interest rate, they can submit an instant loan pre-approval request.

4 Instant Two-Wheeler Exchange Valuation

Customers entering current vehicle model, manufacture year, running kilometers, and condition receive an estimated valuation range and can book an on-site physical evaluation.

5 Workshop Service Booking

Customers select preferred service date, service type (Free Coupon, Periodic Maintenance, Repair), and vehicle registration number. The request lands directly in the Service Manager CRM.

2.2 Automated CRM Ingestion

Every public form submission automatically triggers:

1. Immediate creation of a new customer record (if mobile number does not exist).
2. Creation of a CRM Lead with status `NEW` and unique Lead Number (e.g., `LD-2026-105`).
3. Round-robin or manager-specified assignment to active Sales Executives.

4. In-app alert notification delivered to the assigned staff member.

Role-Based Access Control (RBAC)

CHAPTER 3

3.1 Dealership Role Hierarchy

To maintain strict data security and operational discipline, access to dealership data is governed by granular role permissions.

ROLE TITLE	CODE	CORE RESPONSIBILITIES	ACCESS SCOPE
Main Admin	`MAIN_ADMIN`	Complete system authority, user and role creation, financial ledger audit, CMS controls, settings.	Full System (All Branches)
Showroom Manager	`SHOWROOM_MANAGER`	Supervision of sales pipeline, inventory stock levels, staff assignment, customer dispute resolution.	Dealership Wide
Sales Executive	`SALES_EXECUTIVE`	Customer consultations, lead follow-ups, quotation generation, test ride assistance.	Assigned Leads Only
Service Manager	`SERVICE_MANAGER`	Workshop workflow, job card approval, technician assignment, estimate revisions, gate pass sign-off.	Workshop & Service
Service Executive / Advisor	`SERVICE_ADVISOR`	Customer intake, physical condition recording, job card generation, WhatsApp updates, A4 printing.	Workshop Desk
Finance & Accounts	`ACCOUNTS_OFFICER`	Loan documentation verification, bank coordination, customer invoice creation, payment reconciliation.	Finance & Invoices

3.2 Granular Permissions Matrix

MODULE	MAIN ADMIN	SHOWROOM MGR	SALES EXEC	SERVICE MGR	SERVICE ADVISOR	ACCOUNTS
Dashboard KPIs	Full	Branch	Personal	Workshop	Workshop	Financial
Leads CRM	View / Edit / Del	View / Edit / Reassign	Assigned Edit	View	None	View
Vehicle Inventory	View / Edit / Del	View / Edit	View Only	View Only	None	View
Customers DB	Full Access	View / Add / Edit	View / Add	View / Add	View / Add	View
Service Job Cards	Full Access	View Only	None	Full Workshop	Create / Print / Share	Invoice Gen
Finance & Loans	Full Access	View / Update	View Only	None	None	Process / Update
Staff & Roles	Full Management	None	None	None	None	None
Reports & Export	All Reports	Sales & Stock	My Conversions	Workshop Only	Daily Jobs	Ledgers

3.3 Full-Screen Workspace Toggle

Any logged-in user can click the **"Full Screen" / "Show Menu"** button located in the top header or the collapse icon on the sidebar. This smoothly collapses the navigation drawer, expanding data tables to 100% width. The user's preference is remembered automatically.

Lead CRM & Follow-up Protocol

CHAPTER 4

4.1 CRM Pipeline Stages

Every sales inquiry progresses through defined milestones. Staff must update the status dropdown immediately upon concluding customer communication:

- **NEW:** Newly ingested lead; pending first contact.
- **CONTACTED:** Initial phone call completed; customer requirements identified.
- **INTERESTED:** Customer confirmed interest in a specific vehicle or pricing.
- **TEST_DRIVE:** Customer scheduled or completed showroom test ride.
- **NEGOTIATION:** Price quote, exchange valuation, or EMI terms under active discussion.
- **BOOKED:** Booking deposit paid; delivery scheduled.
- **DELIVERED:** Vehicle delivered to customer; handover completed.
- **LOST:** Customer declined or purchased elsewhere (reason must be logged in notes).

4.2 Follow-up Logging Protocol (Mandatory Standard)

> **CRITICAL COMPLIANCE RULE:**
> Sales executives must record a follow-up log for every customer conversation. The system automatically enforces date and time capture.

Step 1 **Access Lead Details**

In **Admin > Leads CRM**, locate the customer record and click **"Details & Log ↗"**.

Step 2 **Review History & Automatic System Timestamp**

The modal displays the complete chronological history of past follow-ups. The top badge displays the live **System Generated Time** (e.g. `10:45 AM`), guaranteeing tamper-proof activity records.

Step 3 **Select Next Follow-up Date**

Select the future date for the next contact from the **Next Follow-up Date** picker. The system automatically defaults to tomorrow or a future date—it will never leave the date stale on today's date.

Step 4 **Enter Remarks & Save**

Enter summary notes (e.g., "*Spoke with customer; prefers red colour Splendor XTEC; requesting exchange valuation on Saturday*") and click **"Save & Schedule Next"**.

4.3 Automated Log Entry Format

The system automatically records the entry in the following standardized format:

```
[Follow-up Taken: 02 Nov 2026, 10:45 PM | Next Follow-up: 06 Nov 2026] Customer called, requested finance details for 2-year tenure.
```

4.4 Overdue Alert Handling

If the scheduled **Next Follow-up Date** passes without a new log being entered, the lead row highlights in red with an `OVERDUE` badge, and the Manager's Dashboard KPI increments the overdue alert counter.

Vehicle Inventory Lifecycle

CHAPTER 5

5.1 Inventory Classification

Gurudev Motors maintains two distinct inventory classifications:

- **Brand-New Vehicles:** Factory-fresh motorcycles and scooters across authorized brands (Hero, Honda, TVS, Bajaj, Suzuki).
- **Certified Pre-Owned Vehicles:** Thoroughly inspected, workshop-certified used vehicles with complete RTO verification and dealer warranty.

5.2 Adding a Vehicle to Inventory

FIELD NAME	REQUIREMENT	STANDARD / FORMAT
Brand Name	Mandatory	Must select from Hero, Honda, TVS, Bajaj, Suzuki.
Model & Variant	Mandatory	e.g., `Splendor+ XTEC Disc OBD-2`, `Activa 6G DLX`.
Category	Mandatory	Commuter, Sports, Cruiser, Scooter, or Electric.
Ex-Showroom Price	Mandatory	Numerical INR amount (e.g., `79500`).
Engine Specs	Mandatory	Displacement (e.g. `124.7 cc`), Max Power, Transmission (Manual/Automatic).
Fuel & Mileage	Mandatory	Fuel type (Petrol/Electric) and ARAI mileage (e.g. `65 kmpl`).
Stock Status	Mandatory	`IN_STOCK`, `LOW_STOCK`, `BOOKED`, or `SOLD`.

5.3 Image Upload Restrictions & Policy

STRICT SECURITY COMPLIANCE:

To maintain absolute visual consistency and prevent website layout breaks:

- Image uploads are strictly confined to **Vehicle Inventory** and **Showroom Gallery**.
- Public hero backgrounds and cutouts cannot be altered via CMS to safeguard performance and layout.
- Images must be clean, well-lit showroom photos or authentic manufacturer cutouts. Recommended resolution: 1200x800px WebP or JPEG.

Customer Management & Bulk Upload

CHAPTER 6

6.1 Central Customer Database

Every individual who purchases a vehicle, gets service, applies for financing, or registers an inquiry has a permanent profile in **Admin > Customers**. Customer records link directly to sales invoices and workshop job cards.

6.2 Direct Customer Addition (Without a Lead)

Staff can add a walk-in or service customer directly without routing through the CRM sales pipeline:

1. Navigate to **Admin > Customers**.
2. Click the red **"Add Customer"** button.
3. Enter Full Name, 10-digit Indian Mobile Number (mandatory), Email, Address, and City.
4. Click **"Save Customer"**. The system assigns a unique ID (e.g. `CUST-2026-042`).

6.3 Bulk Customer Upload (CSV Import)

For importing historical records, promotional databases, or service customer lists:

1 Prepare CSV Spreadsheet

Create a UTF-8 CSV file with the following column headers in exact order:

```
Name, Mobile, Email, Address, Notes
```

2 Validation Checks

- Mobile numbers must be valid 10-digit Indian numbers starting with 6, 7, 8, or 9.
- Duplicate mobile numbers already existing in the database are safely skipped to avoid record collisions.

3 Execute Import

Click **"Bulk Upload"**, select the CSV file, and confirm. The system processes the records in a single transactional batch and displays a summary of imported versus skipped entries.

Exchange & Finance Processing

CHAPTER 7

7.1 Two-Wheeler Exchange SOP

When a customer brings an old two-wheeler for exchange against a new purchase:

Step 1 **Physical Inspection**

The evaluator inspects engine noise, chassis integrity, tire tread, electricals, and odometer readings.

Step 2 **Document Verification**

Verify Original Registration Certificate (RC), Insurance validity, RTO Challan status (via Vahan portal), and owner identity (Aadhar card).

Step 3 **Valuation Approval & Deductions**

Enter Final Valuation in **Admin > Exchange Requests**. This amount is automatically credited as customer down payment towards the new vehicle invoice.

7.2 Two-Wheeler Finance & Loan Workflow

STAGE	RESPONSIBLE STAFF	ACTION REQUIRED
1. Application Review	Finance Executive	Verify customer PAN, Aadhar, 3-month bank statement, and salary slip / income proof.
2. Banker Routing	Finance Officer	Submit file to preferred partner: HDFC, IDFC First, TVS Credit, Hero FinCorp, or Bajaj Finance.
3. Field Verification (FI)	Bank Representative	Coordinate customer residence and workplace verification.
4. Sanction & DO Issuance	Finance Officer	Obtain Delivery Order (DO) letter from financing bank.
5. Disbursement & Invoice	Cashier & Accounts	Verify down payment received in showroom bank; generate vehicle sales invoice.

Workshop & Job Card SOP

CHAPTER 8

8.1 Physical Job Card Replication Standard

The digital Job Card system precisely mirrors the official physical Gurudev Motors Job Card format. Service Advisors must capture all vehicle and customer details upon intake.

8.2 Job Card Intake Fields

CATEGORY	INCLUDED FIELDS	OPERATIONAL GUIDELINES
Job Card Header	Manual Job Card No, Out Date/Time, Branch	Manual Job Card No is optional; system auto-generates sequential format (e.g. `JC-2026-0816`) if blank.
Customer Details	Name, Address, Phone No, Email	Ensure valid WhatsApp mobile number for sending job card copy.
Vehicle Details	Model, Type (Kick/Self), Frame No, Engine No, Colour, Reg No, Date of Sale, KMs Run, Key No, Free Service Coupon No, Selling Dealer	Inspect odometer and verify chassis/engine number against physical plate. Free coupon number must be recorded for warranty claims.
Type of Service	Free Service, Paid Service, Extended Warranty, AMC, Accidental, General Repair, Complaint	Multi-select checkboxes indicating all applicable service categories.
Customer Requests & Advice	Dynamic 3-Column Table: 1. Regular Customer Request 2. Special Request / Comments 3. Repair Advice / Action Taken	Add multiple rows dynamically. Service Advisor records customer voice and technician diagnosis side by side.
Itemized Cost Estimate	Parts Charges, Labour Charges, Consumables, Total	System calculates estimated cost. Customer must authorize estimate before repairs commence.

8.3 Physical A4 Printing & Detachable Gate Pass

Official A4 Printout Standards:

Clicking **"Print Job Card"** opens the official A4 document designed specifically for workshop clipboards:

- Includes official Gurudev Motors Header with complete address and contact details.
- Contains signature blocks for Service Advisor, Supervisor, Technician, and Customer Authorization.
- Includes detachable bottom section: **"CUSTOMER COPY / GATE PASS"** with workshop timings (10:00 AM to 7:00 PM, Lunch 1:00 PM to 2:00 PM, Sunday 10:00 AM to 5:00 PM).

8.4 One-Click WhatsApp Sharing

Clicking **"Share via WhatsApp"** prepares an automated, formatted message sent directly to the customer's phone containing vehicle model, registration, job card number, estimated cost, and expected delivery time.

Invoicing, Billing & Collections

CHAPTER 9

9.1 Invoice Issuance Rules

No vehicle or repaired motorcycle may leave the dealership premises without an authorized tax invoice or cashier gate pass.

1 Workshop Service Invoice

Upon job card completion, convert the finalized job card items into a tax invoice. Parts charges must reflect genuine manufacturer MRP; labour charges must follow dealership standard labour schedule.

2 Vehicle Sales Invoice

Generated upon receipt of full payment (Cash/UPI/Bank Transfer + Bank Loan DO). Specifies engine number, frame number, battery serial number, helmet issuance, and road tax details.

9.2 Payment Methods & Reconciliation

PAYMENT METHOD	VERIFICATION PROCEDURE	RECEIPT PROTOCOL
Cash	Verified using counterfeit detection machine by cashier.	Issue printed cash receipt immediately. Maximum cash transaction as per Income Tax limits.
UPI / QR Code	Verify transaction ID and green tick on official showroom soundbox.	Record UTR number in invoice payment notes.
Credit / Debit Card	Swipe on authorized POS terminal; verify customer slip.	Attach POS merchant copy to showroom invoice copy.
Bank Finance DO	Verify original Delivery Order with bank officer signature.	Submit invoice and RC documentation to bank for disbursement release.

Dealership Reports & Analytics

CHAPTER 10

10.1 Management Reporting Modules

Located in **Admin > Reports & Analytics**, management can track dealership health in real time:

REPORT MODULE	KEY METRICS TRACKED	EXPORT OPTIONS
Executive Overview	Total Revenue, Units Sold, Active Job Cards, Conversion Rate, Overdue Follow-ups.	A4 Printable PDF, Email Share
Sales & Delivery	Vehicle-wise sales volume, brand breakdown (Hero, Honda, TVS, etc.), sales executive performance.	CSV Spreadsheet, A4 PDF
Workshop & Service	Job card turnaround time, labour revenue, spare parts sales, free service coupon tallies.	CSV Spreadsheet, A4 PDF
CRM Follow-up Health	Lead response time, overdue follow-up count per executive, lost enquiry reasons.	CSV Spreadsheet
Inventory Aging	Days in stock, slow-moving models, fast-selling colour variants.	CSV Spreadsheet

10.2 Clean A4 PDF Report Printing

Clicking **"Print Report"** prints an official A4 document with the Gurudev Motors logo, date range header, formatted summary tables, and executive signature block.

Admin Governance & Security

CHAPTER 11

11.1 Creating New User Roles

The Main Admin can create bespoke roles in **Admin > Roles & Permissions**:

1. Click **"Create New Role"**.
2. Enter Role Name (e.g. *Senior Inventory Auditor*) and Role Code.
3. Toggle permissions for each module: **View**, **Create**, **Edit**, **Delete**.
4. Click **"Save Role"**. The new role immediately appears in the employee assignment dropdown.

11.2 Audit Logging Standard

Every critical system action is permanently preserved in **Admin > Audit Logs**:

- **User Identity:** Email and staff name who performed the action.
- **Timestamp:** Exact date and time down to the second.
- **Module & Action:** e.g., `LEADS: UPDATE`, `SERVICE: CREATE`.
- **Change Delta:** Records previous value versus updated value.

11.3 Password & Session Security

Security Policies:

- Staff accounts must use passwords containing at least 8 characters, an uppercase letter, and a number.
- Sessions automatically expire upon inactivity; staff must click **"Sign Out"** before leaving workstations.
- Never store customer Aadhar or banking documents on personal mobile devices.

Daily Operational Checklists

CHAPTER 12

12.1 Morning Opening Checklist (09:45 AM)

DEPARTMENT	ACTION ITEM	RESPONSIBLE PERSON
Showroom Floor	Inspect display vehicles, ensure clean dust-free bikes, verify price placards.	Floor Incharge
Sales Team	Log in to Admin CRM; filter **Due Today** and **Overdue** follow-ups; plan outbound calls.	Sales Executives
Workshop	Check bay tools, air compressor pressure, test ride helmets, print pending job cards.	Service Manager
Accounts Desk	Verify POS terminals, receipt printer paper rolls, cash float balance.	Showroom Cashier

12.2 Evening Closing Checklist (07:15 PM)

DEPARTMENT	ACTION ITEM	RESPONSIBLE PERSON
Sales & CRM	Ensure every customer interaction has a logged follow-up with future next date. Zero unlogged leads.	Sales Manager
Workshop Gate	Tally delivered vehicles against signed Customer Gate Passes. Secure overnight vehicles inside bay.	Service Advisor
Cash Counter	Tally daily physical cash, UPI settlement, and card slips against Accounts Report. Submit daily envelope to locker.	Accounts Officer
System Admin	Verify all staff logged out; review high-priority audit logs.	Main Admin

12.3 Emergency Escalation Matrix

For urgent operational bottlenecks, staff should contact the designated hierarchy:

- **Customer Escalations & Delivery Delays:** Showroom Manager (+91 7000619808)
- **Technical Service & Warranty Disputes:** Workshop Head (+91 7000619808)
- **Software, System Access & Role Permissions:** System Administrator
